Strategy

Product innovation and performance: Product evolution is key in addressing the distinctive need of our customers. Our continued focus is to evolve our products to better meet those needs and become more widely applicable and better performing than competitive solutions.

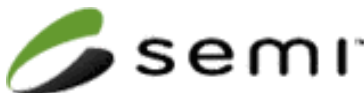

Customer experience: We believe in enhancing our customer experience through highly advanced user interfaces and software support systems help increase confidence in using the product.

Consumer demand creation: Marketing the product benefits in terms of increased process throughput and product long life is what drives potential customers to ask for PROMA products by name. We continue to create awareness and motivation among several key markets in Japan, Korea and North America.
